

STAR SERIES

**A GALAXY OF GAMES
UNDER ONE UNIVERSE**

INSTANT INTERCHANGEABILITY PROVIDING MULTI-GAME CAPABILITIES IN ONE COMPACT UNIT

ASTRO LASER

It's a true test of brains and brawn. The strength of your powerful laser is determined by the amount of fuel left to propel it. Fire wisely and destroy your opponent. Proceed wrecklessly and your fate will be judged accordingly.

MOON LANDER

Stranded astronauts await the arrival of your rescue ship. Cautiously maneuver your craft through unfriendly space, retrieve your vulnerable allies and be rewarded for your efforts. Your ability to reunite with the base ship will also be tested.

SPACE RANGER

You and your rocket are on the menu of a school of cosmic fish swimming in a sea of space. Your missile and four anchor barriers are your defense against their rhythmic attack. Destroy the predators and prepare for another wave of an increased speed.

Its Time Has Come

A fresh new concept in game design.

One piece interchangeable game

modules offer an operator the option of three exciting and completely different game variations in one unit. Each Star Series comes equipped with one game module. Additional new game modules are available for purchase.

Before You Can Say...

Within minutes a new game module can be installed in the convenient side door assembly. The cabinet, monitor, coin equipment and transformer remain intact.

High Profits... Low Maintenance

Star Series is designed with ease of service in mind. All components are readily accessible and that means less costly downtime.

Standard Features

Star Series is designed for 1 or 2 players and features a 23 inch monitor ... the largest the industry has to offer.
